

The Proof is in Our Numbers

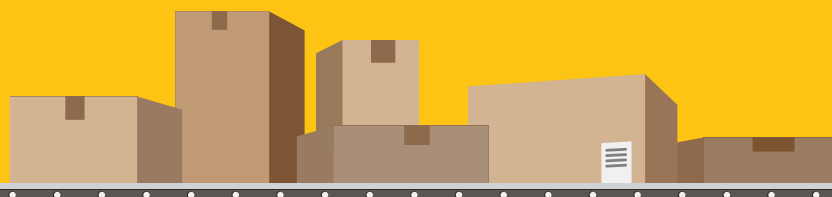

VARGO®'s team of warehousing, fulfillment and distribution center experts have been exceeding customer expectations for more than four decades. But don't take it from us — the proof is in our numbers!

A VARGO® omnichannel customer achieves record fulfillment numbers with one warehouse, one engine, one inventory and one workforce.

400,000

Total number of distinct SKUs picked each day in four national retailers' fulfillment centers during the peak week of online holiday shopping after Thanksgiving.

VARGO® has more than

FOUR DECADES

of successful intelligent Warehouse Execution Systems (WES), systems integration, distribution center process improvement and specialized material handling equipment.

Average order cycle time of

20

minutes
on a
peak day.

22%

Growth that four COFE®-powered fulfillment centers experienced from 2015 to 2016 in number of units processed in one peak, seven-day period.

1,729,031

Units one retailer processed in six days.

30 +

The percentage improvement in efficiency in COFE®-driven sites over centers driven by traditional warehouse systems.

6.8 MILLION

Total number of units processed in one peak, seven-day period in four fulfillment centers combined.

2.25 MILLION

Cumulative number of **orders** that four leading fulfillment centers packed in one **peak week**

COFE® WES (Warehouse Execution System)

VARGO®'s COFE® waveless picking operation is coupled with waveless sorting to individual orders, completing orders continuously and increasing both fulfillment flexibility and processing speed. COFE® does for fulfillment what Lean did for manufacturing.

Problem solved.

Warehouse fulfillment shouldn't be complicated.

PROVEN. SUCCESSFUL. SIMPLE.
